

Packaging Aids D666-MPCV & D665-M CONTIMED Band Sealers

Tabletop Medical Continuous Band Sealers

CONTIMED sealers are small footprint tabletop band sealers for use in medical, pharmaceutical, and dental applications when seal integrity is paramount. They are ideal for those with limited budget, space, or capacity requirements who need the reliability of a medical quality continuous band sealer. The validatable **Contimed D666-MPCV** is equipped with statistical process control for validation of speed, temperature, and pressure to ensure seal integrity.

Standard Features & Benefits D665-M and D666-MPCV

- Compact designs that are both cost effective and flexible.
- Sealing temperatures to 200° C with digital controller.
- Automatically adjusted sealing pressure
- Photocell controlled start signal
- Seal a wide variety of bag materials including paper, polypropylene, and Tyvec.
- Stainless Steel front and top plate
- Adjustable bag guide

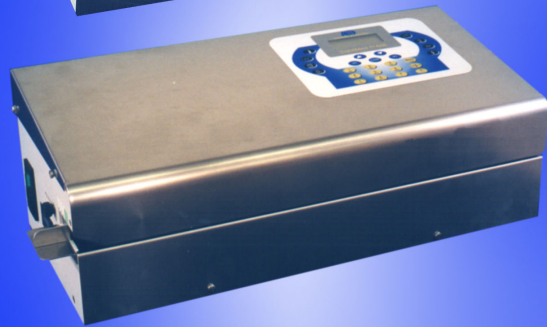

Features unique to the D666-MPCV:

- Validatable: capture seal parameters through serial port.
- Built-in 80 character dot matrix printer can print: date, operator name, serial number, and codes directly onto the seal of the pouch.
- Up to sixteen programmable sixteen character operator codes
- Available bar code scanner and label printer.

D665-M

D666-MPCV

Specifications:	D665-M	D666-MPCV
Seal Speed	315 in/min	385 in/min
Seal Width	½", 5 line	½", 5 line
Dimensions	21½"W x11"Dx9"H	26"W x11"Dx9"H
Electrical	115 VAC	

Options:

- Both: Stainless steel workshelf
Stainless steel slip roller conveyor
- D666: Label Printer
Bar code scanner and software
Flat Seal
